Stability Tour

BGT BREAKTHROUGH GOLF TECHNOLOGY

The Putter Shaft That Changed the Game Forever.

One of the best-selling putter shafts of all time for a reason: innovative design with tour-proven performance. Transform your short game with stability tour.

Look — Streamlined, slim look which tapers to a 13% reduction in the shaft diameter. Fits any putter, regardless of make, model, or bend profile.

Balance — It will balance like a steel shaft which makes it easy to recreate a specific swing weight when re-shafting. Better golfers can replace their steel shafts without changing the balance of the putter.

Feel — Offers a soft feel. It will match the balance point and flex profile of steel with 30% more carbon fiber for crisp, responsive sound and control.

Which Stability Is Right For Me?

All Stability Putter Shafts have the same great performance with 1 degree of torque. Patented technology ensures that your face remains square at impact, delivering consistent and smooth putts every time.

Stability Tour

Multi-piece technology with slim, taper design

Fits any putter

Soft Feel
