

GG PUTTERS, GOLF PUTTERS 100% MADE IN ITALY

INNOVATE YOUR GAME

GG Putters are engineered for precision and are fully customizable, giving you the ultimate control over every stroke. With either Antares or Orion, you'll experience a three-position weight system designed to help you find your perfect balance effortlessly—so you can sink every putt with confidence.

MADE IN ITALY, GAME-READY.

Born in Brescia, Italy, our story is rooted in metalworking tradition, but our vision goes beyond time. With decades of experience, we blend passion and innovation, transforming metal into living creations.

Italian craftsmanship is at the core of our work, with every detail designed to be unique. We don't follow tradition; we reinvent it, creating products that carry the soul of our land and dedication.

BORN IN A GARAGE, DRIVEN BY PASSION.

It all started in a garage in the 1980s. Our company grew in the heart of Italy's metalworking industry, starting from a small space and a big vision. We've always been driven by passion and fueled by innovation.

The first metalworking machines were installed in that very garage. Our company specializes in the creation of technical design objects, and the fusion of our technical expertise with our love for golf gave life to something truly unique: GG PUTTERS.

DESIGNED FOR SUCCESS.

Thanks to its precise design, the combination of aluminum and steel, and technical features like interchangeable weights and custom face inserts, the ball rolls immediately and smoothly.

Unlike traditional putters, the trajectory is not elliptical but straighter, making your stroke more accurate and reliable. A straighter roll means more putts holed — with confidence.

ELEVATE YOUR GAME.

Each GG Putter is the perfect balance between functional design and artisanal mastery. Milled from a single block of aluminum and seamlessly combined with steel components, it delivers solidity, control, and exceptional feel.

The face of the putter is engineered to set the golf ball rolling immediately along a stable and precise trajectory, allowing the player to sink the putt effortlessly and with confidence.

YOUR BEST GAME STARTS HERE.

At the core of the GG Putter lies its adjustable weighting system: you can choose how to position the three weights across the three dedicated weight points to find the ideal arc stroke that best suits your game.

Every detail, every finish, is carefully refined by expert hands in Brescia, a city renowned for its centuries-old excellence in metalworking.
