

WishonGolf The Leading Name in Clubmaking Technology

Head	Loft	Lie	Weight	Face Height	Head Length	Face Prog.	Shaft to Use	RH/LH
TWCB-1	3°	71°	355g	25mm	122mm	-4.5	Straight	RH/LH
TWCB-2	4°	72°	365g	23mm	117mm	-4.0	Straight	RH
TWCB-3	3°	90°*	350g	22.5mm	102mm	4.0**	Single Bend/ Offset Double Bend	RH/LH
TWCB-4	3°	72°	380g	24.5mm	99mm	-4.5	Straight	RH

*90° Bore requires single bend or offset double bend putter shaft with the lie bent into the shaft.
 **Face Progression of +4.0mm is based on measurement with a single bend shaft installed. When using a double bend shaft, face progression is determined by the shaft's second bend.

Head Material:

17-4 Stainless Steel

Method of Mfg:

Investment Cast

Ferrule Required:

No

Bore Diameter:

For all Putters - 0.370" parallel

Loft/Lie Bending:

For Models 1, 2, 4 - +/-2° in all directions by hosel

For Model 3 - Loft/Lie bending has to be done on the shaft

Wishon's collection of quality putter designs...

Features:

- Open Cavity Design in each putter allows higher MOI for superb off center hit performance
- Three Mallet style designs with different alignment aid options to fit a wide range of golfers
- The Cavity Black Heel/Toe model is oversize for easier alignment and higher MOI
- Black Oxide finish with striking red and bead blast highlights
- All models available in RH; Models 1 and 3 are available in LH
