KNUTH GOLF MASTER FITTER & BUILDER

KINETIXX CERTIFIED SHAFT FITTER

FUJIKURA CERTIFIED SHAFT FITTER

Online help with fitting information and recommendations. Most of my customers are experienced golfers who know their game, usually know their measurements and stats, and pretty much know what they want. They just need someone to recommend the best fitting components, supply them and put them together.

That's where I come in. With more than 25 + years of experience and training, I work with Wishon Golf Technology, Knuth High Heat Golf, Krank, Bang, Kinetixx and Fujikura to supply world class quality components and customize them to your specifications. Tom Wishon is a world renown designer and manufacturer of world class components. His designs are state of the art technology and since they don't mass produce clubs by the thousands, their attention to quality is second to none. Every head is QC'd. Krank Golf has dominated the Long Drive Tour for 20 years with some of the best technology and materials available for drivers and fairway woods. These are not brands you'll find at the "big box" stores. They are world class quality components designed to be custom fit to the individual golfer, not mass produced to sell to the unsuspecting consumer. You don't think the pros play with clubs off the shelf from the Superstore do you? Of course not, they are all hand built and fit to their game, as yours should be. Play your best by starting with equipment that fits you.

I stock most of the components from Wishon, Krank, Bang and Knuth High Heat Golf. I also stock a huge inventory of Fujikura, Kinetixx, and Wishon shafts along with Jumbomax and Super Stroke grips. I also stock and sell several other brands like Warrior and SMT Golf.
